Disposal instructions for used products:

The product is designed and manufactured with high quality materials and components that are recyclable.

This symbol on the product indicates that it is protected under the Directive 2012/19/EU.

FCC Warning

The device meets provisions of part 15 of FCC rule. Operation meets the following 2 conditions:
 (1) The device will not cause harmful interference, and
 (2) The device must accept any interference received, including interference that may result in accidental operations. User manual or operating instructions shall remind users that intentional or unintentional modification and replacement of radiators without explicit approval from the responsible compliance committee may prevent the user from operating the device. If the manual is provided in a form other than paper, such as, provided in computer disk through the Internet, then the information required in the section can be included in the manual in the alternative form under the premise that users can have access to the form information.

Note:

The device has been tested to meet restrictions of part 15 of FCC rule on B-class digital device. These restrictions are aimed at providing the effective prevention of harmful interference in a residential installation. If installation and use are not made according to the instructions, the device will generate and radiate radio frequency energy, and may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If the device does cause harmful interference to radio or television reception (determined by stopping and starting the device), it is suggested that users should attempt to correct the interference by one or more of the following measures:

- Reposition direction of receiving antenna.

- Increase the distance between the device and the receiver.

- Connect the device into an outlet on a circuit different from that to which the receiver is connected.

- Consult distributors or experienced radio/television technicians to seek help.

- Consult distributors or experienced radio/television technicians to seek help.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.

- This Frequency applies to the following Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist.

- For remote control, this device complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment.

- The transmitter shall not be placed or operated in conjunction with any other antenna or transmitter.

- For the laser projector, the device meets FCC and IC radiation exposure limits specified for uncontrolled environments. In the installation and operation of the device, the distance between radiator and body should be at least 20 cm.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.

- This Frequency applies to the following Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist.

- For remote control, this device complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment.

- The transmitter shall not be placed or operated in conjunction with any other antenna or transmitter.

- For the laser projector, the device meets FCC and IC radiation exposure limits specified for uncontrolled environments. In the installation and operation of the device, the distance between radiator and body should be at least 20 cm.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.

- This Frequency applies to the following Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist.

- For remote control, this device complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment.

- The transmitter shall not be placed or operated in conjunction with any other antenna or transmitter.

- For the laser projector, the device meets FCC and IC radiation exposure limits specified for uncontrolled environments. In the installation and operation of the device, the distance between radiator and body should be at least 20 cm.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.

- This Frequency applies to the following Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist.

- For remote control, this device complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment.

- The transmitter shall not be placed or operated in conjunction with any other antenna or transmitter.

- For the laser projector, the device meets FCC and IC radiation exposure limits specified for uncontrolled environments. In the installation and operation of the device, the distance between radiator and body should be at least 20 cm.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.

- This Frequency applies to the following Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist.

- For remote control, this device complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment.

- The transmitter shall not be placed or operated in conjunction with any other antenna or transmitter.

- For the laser projector, the device meets FCC and IC radiation exposure limits specified for uncontrolled environments. In the installation and operation of the device, the distance between radiator and body should be at least 20 cm.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.

- This Frequency applies to the following Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist.

- For remote control, this device complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment.

- The transmitter shall not be placed or operated in conjunction with any other antenna or transmitter.

- For the laser projector, the device meets FCC and IC radiation exposure limits specified for uncontrolled environments. In the installation and operation of the device, the distance between radiator and body should be at least 20 cm.

- Notes:

- 510-5250 MHz frequency range is only for indoor use.
